Expense tracking

SpendSmart

Personal expense tracking, with your data saved in your browser.

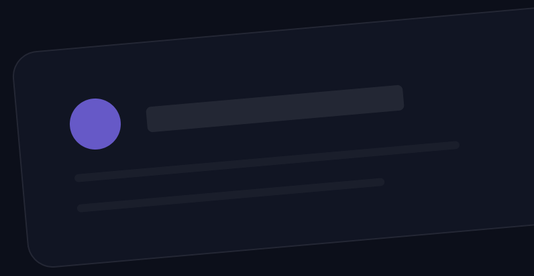

Chart.js

localStorage

income

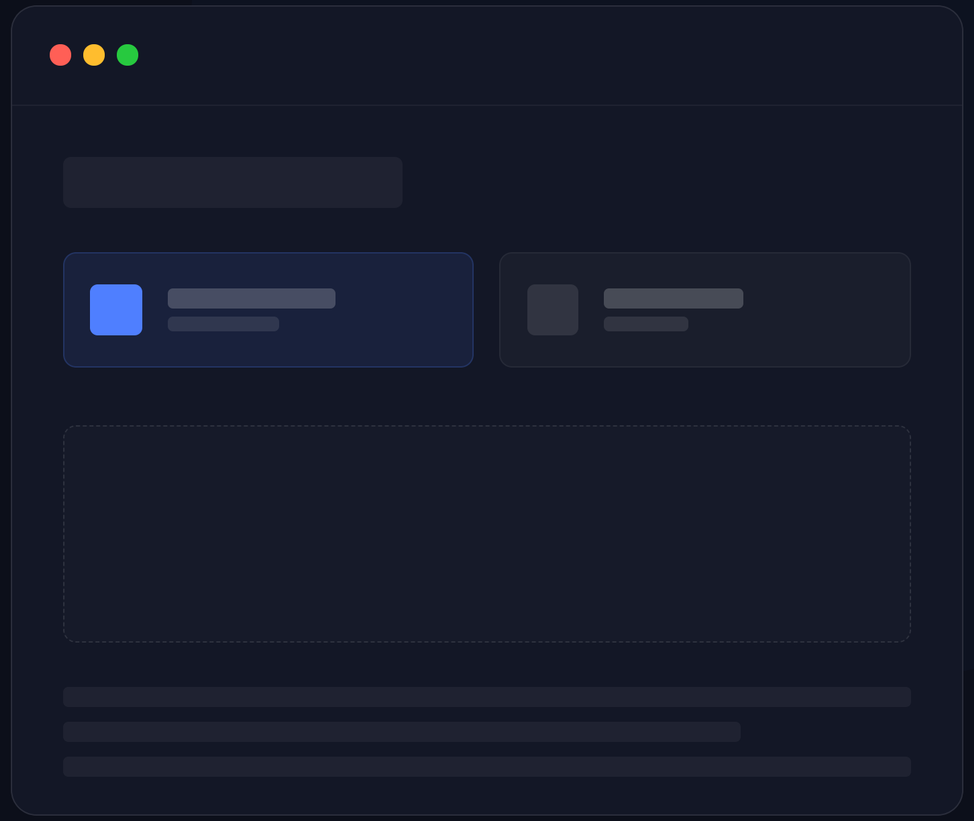

month

CSV

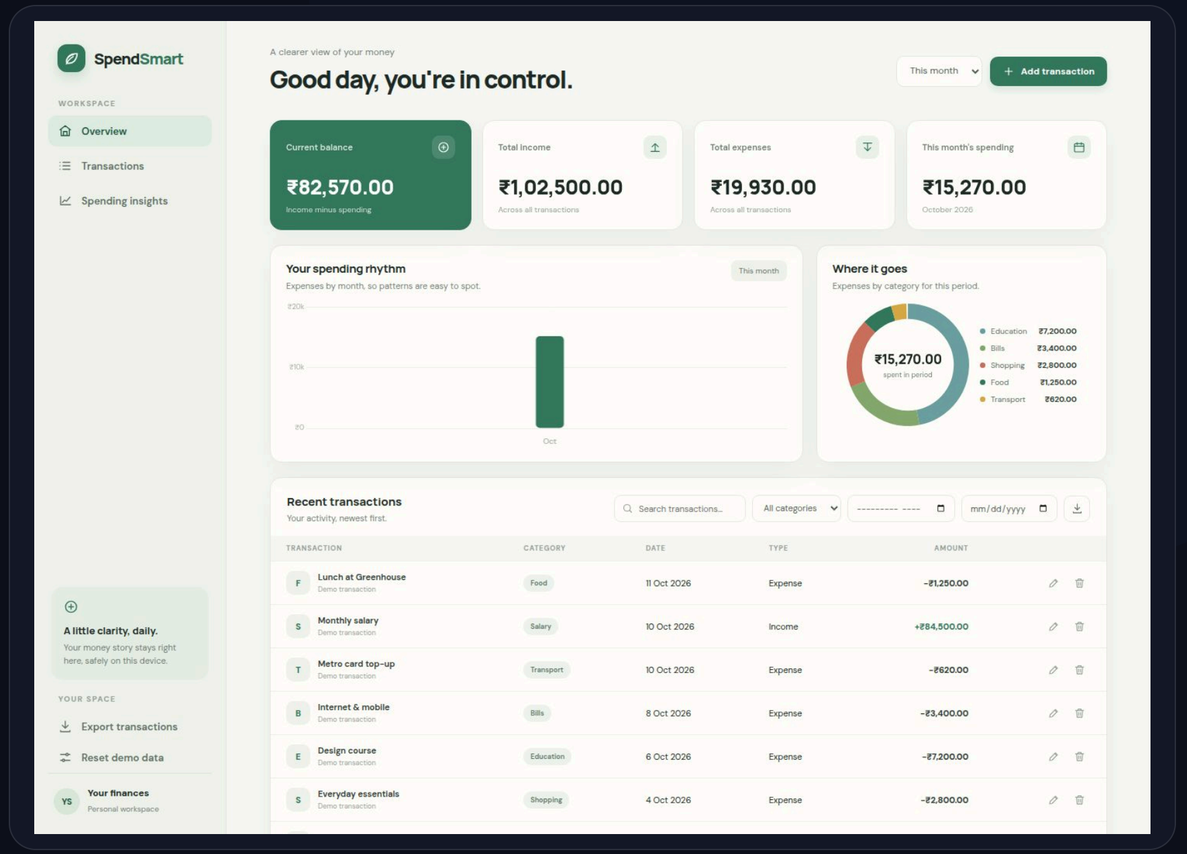

Keep the money picture clear

- One balance, calculated as income minus expenses
- Total income and total expenses, shown separately
- Current-month expenses highlighted

See the dashboard at a glance

- Summary cards and recent activity, newest first
- Searchable transactions with category and date filters
- Charts update when transactions change

Record every transaction

Amount, type, category, date, and description

Add, edit, or delete transactions with a confirmation step

Required fields and positive amounts are validated

Find records and take data with you

Search descriptions, categories, and transaction types

Filter by category, month, or exact date

Export transaction records as CSV

Spot category and monthly patterns

Doughnut chart groups expenses by category

Bar chart reports expenses for the selected period

View this month, last month, this year, or recent 12 months

Your data stays in this browser

Transactions persist in browser localStorage

No account, backend, or cloud syncing

Export CSV for a portable copy

A lightweight, responsive build

- HTML, CSS, and vanilla JavaScript
- Chart.js loaded from its CDN
- Responsive desktop and mobile interface
- Vite runs and builds the web app
